2. Citations and explanations (Rule 70.7)

Reference is made to the following document :

D : KR2002-0056833 A (2002.07.10)

Claims 1-4 of the present invention describe the technical feature that home location register disperses the service subscribers taking intelligent peripherals capacity into the corresponding intelligent peripherals(IPs) by having an operator change the routing number to IPs on home location register.

D relates to a method & an apparatus for subscriber-based ring-back-tone service which comprises the following functions: transmitting routing data that a home location register can set up an arc by using service information & IP through the corresponding mobile switching center; notifying the inflow of a call-receiving signal with IPs by using routing data; delivering a special sound source instead of ring-back tone to the receiving subscriber.

Whereas, it is a generalized technology to reduce loading by installing multi-servers in wire or wireless telecommunication fields.

Therefore, claims 1-4 of the present invention can be easily devised by a person skilled in the art through D. The subject matter of Claims 1-4 do not involve an inventive step in the sense of Article 33(3)PCT.

The industrial applicability of Claims 1-4 is self-evident in the sense of Article 33(4)PCT.
